

# Lightweight, tubular dressing retention

New Tubifast 2-Way Stretch is the world's first and only lightweight elasticated tubular bandage with radial and longitudinal stretch! This unique mode of action allows patients complete freedom of movement, with added comfort. Ideal for dressing retention and skin covering for any part of the body. It can also be used for patch wrapping and as an under-cast stockinette. Tubifast 2-Way Stretch holds dressings securely in place without the need for tapes, pins or ties. It is quick and easy to use, with less risk of fraying<sup>2</sup> than traditional tubular bandages.

Tubifast 2-Way Stretch holds dressings securely, without constriction or compression, giving additional peace of mind

Tubular presentation – no requirement for pins or tape

Quick and easy to use: cut to size and stretch over the dressing for an even, non-constrictive fit

Quickness and ease of use means the risk of cross-contamination is reduced

Less fray, so there is less risk of fibres in the wound<sup>2</sup>

The variety of lengths available ensures that it is cost-effective by minimising waste

Available in 5 colour-coded widths, Tubifast 2-Way Stretch has been designed to fit snugly over all limbs, no matter what the shape or size

Tubifast 2-Way Stretch's light, radial and longitudinal elasticity allows patients complete freedom of movement, with added comfort<sup>1</sup>

### How Tubifast 2-Way Stretch works

New Tubifast 2-Way Stretch is manufactured from viscose with very fine elastane threads knitted into the fabric radially and longitudinally, to provide light elasticity.

Tubifast 2-Way Stretch holds dressings securely, without constriction or compression. No pins or tapes are necessary. Its two-way stretch allows patients complete freedom of movement and added comfort.

Tubifast 2-Way Stretch is available in a range of five widths, and has been designed to fit snugly over all limbs, no matter what the shape or size.

Each size is identified by a coloured line knitted into the bandage. It's quick and easy to use: cut to size and stretch over the dressing for an even, non-constrictive fit.

### Areas of use

Tubifast 2-Way Stretch can be used as a dressing retention and skin covering for any part of the body. It can also be used for patch wrapping and as an under-cast stockinette.

Because of its tubular construction, Tubifast 2-Way Stretch is particularly suitable for holding dressings in place on difficult areas such as stumps of amputee patients.

### How to use Tubifast 2-Way Stretch

1. Choose the correct width bandage, using the quick reference colour coding, and cut to length.

2. Stretch Tubifast 2-Way Stretch over the affected area.

3. Position Tubifast 2-Way Stretch to cover the dressing. Illustrated, step-by-step instructions are available for more advanced applications.

### Benefits of Tubifast 2-Way Stretch

- Tubifast 2-Way Stretch holds dressings securely, without constriction or compression
- Its radial and longitudinal stretch allows patients complete freedom of movement, with added comfort<sup>1</sup>
- A variety of lengths are available, ensuring cost- effectiveness by minimising waste
- Quick and easy to use: simply cut to size and stretch over the dressing for an even, non-constrictive fit
- Available in a range of quick reference, colour-coded sizes, to fit everything from small limbs to adult trunks
- It has less fray so there is less risk of fibres in the wound<sup>2</sup>
